

Sparkle Up Plymouth !!!

Plymouth Economic Development (PED) is embarking on a project to enhance the look and feel of the Main Street area. The reason is to make the town more inviting and enchanting. The tool for accomplishing this will be outline lighting on both sides of the street on the buildings between Highway 49 and the Montessori School.

Mother Lode cities like Angles Camp, Sutter Creek and others have adopted this approach to beautifying their Main Streets. Here is the tentative package we are putting together for the owners or occupants of Main Street buildings.

1. *There is **no fee** to purchase these lights or to have them installed. It will be done by volunteers and overseen by professionals. Funds will be donated. You may be asked for a donation but it is not required.*
2. *The **cost to operate** these lights is **about \$1.00 per month per building**. We would like the building tenant or owner to pay this. For hardship cases, PED will work to find a solution.*

TENTATIVE SPECIFICATIONS: Energy-efficient (less than 10% of the costs of incandescent lights) LED technology C9 bulbs that are UL listed for outdoor use, non-dimmable. Warm White bulbs with a 5 season warranty/50,000 hour bulb life. 12" spacing using commercial grade SPT-1, 7 Amp green wire (840 Watt). Commercial quality Admiral brand sockets with a maximum run of 240 sockets with 1 Watt LED bulbs (our runs will be around 120 sockets). Professional C-Clips for installations of lighting that faces horizontally, using screws, glue or caulk. Each UL listed outdoor timer has a photocell that can be set so that the lights come on at dusk and turn off automatically about 4 hours later (PED sets the hours).

Please sign the agreement below to allow us to put these lights on your building. If your building is rented or leased, we will also ask the occupant to sign an agreement.

I agree that Plymouth Economic Development (PED) and or their contractors may put these lights on my building. By my agreeing to this, PED and/or its contractors hold the building owners and tenants harmless from any damages or injury while installing.

Property Address _____ Date _____
